Growing Scholars provides free tutoring to students in Pre-K-12th Grade, who are attending schools that did not make AYP (Adequate Yearly Progress).

We provide a customized curriculum that focuses on both reading and math.

Our curriculum adapts to each child's pace and learning needs. Our facility is highly conducive to learning and our tutors have a passion for teaching.

Growing Scholars Educational Center is designed to encourage, inspire and equip every student with the academic skills and strategies needed to be successful in their future endeavors.
